Re Additional Information to be Added to Task ID 2748, Soil Sampling Analysis, PacifiCorp,
Deer Creek Mine, C/015/0018, Emery County, Utah

PacifiCorp, by and through its wholly-owned subsidiary, Energy West Mining Company ("Energy West") as mine operator, hereby submits additional supporting information for the application to include soil sample analysis results of the 2002 soil sampling program at the Deer Creek Mine. Deficiency responses were submitted on February 6, 2007 that replied to the December 21, 2006 deficiency list of the Division of Oil, Gas, and Mining review.

This information was developed through a cooperative effort between Energy West and the Division and includes a revised soil sampling plan that insures suitable substitute topsoil for reclamation of the mine site. Results of the 2002 soil sampling program found elevated sodium contents of the soils that were to be used as a substitute topsoil cover. Commitments have been incorporated into the Mining and Reclamation Plan to resample the substitute topsoil areas and analyze for Electrical Conductivity and SAR values once within each permit term, until such time as the soils are found acceptable for use. This information has been added to Soils Section in Volume 2, Part 4 of the Deer Creek Mining and Reclamation Plan.

Map DS1810D was found to possess a typographic error. The date that the slope stability analysis was performed was listed as 2001, when it actually occurred in 2000. This map is included with this submittal and should replace the map that was originally submitted in July 2006.

The required C1/C2 forms are included which shows where this information will be incorporated when approved. Seven (7) redline/strikeout copies of Volume 2, Part 4, Soils Section and Map DS1810D are also included for your review. If you have any questions or concerns with the information submitted, please contact Dennis Oakley at (435) 687-4825.

Sincerely

Kenneth S. Fleck
